SKILLS & EXPERTISE

FRONTEND & UI ENGINEERING

React.js Next.js TypeScript

JavaScript (ES6+) Tailwind CSS

Redux Toolkit Responsive UI

Progressive Web Apps (PWA)

Accessibility (WCAG)

GEOSPATIAL & VISUALIZATION

Leaflet.js Mapbox GL JS

Geospatial Dashboards

Time-Series Data Visualization

GeoJSON Interactive Maps

BACKEND & API DEVELOPMENT

Python FastAPI

Django REST Framework Node.js

Express RESTful APIs GraphQL

Microservices Architecture

WebSockets / Real-Time Streaming

MOBILE & DESKTOP APPS

React Native (Mobile)

Electron.js (Desktop Applications)

Cross-Platform Optimization

Offline Synchronization

DATABASES, CLOUD & DEVOPS

PostgreSQL (PostGIS) MongoDB

Redis (PubSub/Caching)

AWS (S3, EC2) Docker

CI/CD Pipelines Git/GitHub

CORE ENGINEERING PRACTICES

Extreme Reliability

Rapid Domain Onboarding

Secure Application Development (JWT, RBAC)

Unit/Integration Testing

API Documentation (OpenAPI/Swagger)

EDUCATION

Diploma in Computer Science
Petroleum Training Institute
Sep 2021 — May 2025

PROFESSIONAL SUMMARY

Dependable, high-ownership Full-Stack Developer with 3+ years of experience engineering secure, performant web, mobile, and desktop applications. Proficient in modern frontend architectures (React, TypeScript), robust backend microservices (Python, FastAPI, Django, Node.js), and scalable databases (PostgreSQL, PostGIS, Redis). Recognized for extreme reliability, proactive cross-functional collaboration, and rapid learning agility—quickly mastering complex domain logic such as satellite telemetry, geospatial visualizations (Leaflet, Mapbox), and real-time streaming to deliver resilient, mission-critical systems.

PROFESSIONAL EXPERIENCE

Full-Stack & Cross-Platform Application Developer

2025 — Present

Remina App

- Spearheaded end-to-end full-stack development of cross-platform web and mobile applications using React, TypeScript, and Python backends.
- Engineered interactive real-time dashboards and media management modules, cutting UI response times to sub-100ms across mobile and desktop viewports.
- Integrated asynchronous backend workers and WebSocket streaming channels for instant live updates and fault-tolerant data synchronization.
- Collaborated closely with QA and infrastructure engineers to enforce strict JWT authentication, role-based permissions, and end-to-end payload encryption.

Founder & Lead Full-Stack Engineer

Jun 2024 — Present

Code and Canvas (Web & Software Solutions)

- Architected and deployed custom full-stack web, mobile, and desktop solutions for enterprise and SME clients, maintaining 99.9% uptime across production releases.
- Built dynamic geospatial mapping modules and coordinate tracking interfaces using Leaflet and Mapbox integrated with PostgreSQL and REST APIs.
- Designed modular microservices and containerized workflows with Docker, accelerating deployment pipelines and ensuring reproducible environments.
- Maintained comprehensive architectural diagrams, API documentation (Swagger/Postman), and automated CI/CD pipelines to ensure seamless team maintenance.

Software Engineering Consultant

Mar 2024 — Aug 2024

Independent Technical Contracts

- Delivered scalable web and API platforms, integrating high-throughput database schemas with PostgreSQL and caching layers with Redis.
- Engineered responsive, accessible front-end interfaces adhering to WCAG standards, improving user retention by 35%.
- Implemented rigorous unit and integration testing suites to guarantee deterministic data processing and zero regression bugs.

KEY PROJECTS & ACHIEVEMENTS

Geospatial & Satellite Telemetry Visualization Engine

🔗 github.com/runo25

React Leaflet Python FastAPI PostgreSQL (PostGIS) Redis Docker

- Architected an interactive geospatial portal rendering live coordinate streams, boundary polygon overlays, and telemetry data points with low-latency updates.
- Implemented spatial indexing in PostgreSQL and Redis caching to render multi-layered geo-datasets smoothly even over constrained bandwidth.

AI Document Intelligence & Automation Pipeline

🔗 <https://github.com/runo25/format>

Python FastAPI Jinja2 WeasyPrint Pydantic Docker

- Architected an automated document pipeline extracting structured JSON entities and compiling pixel-perfect, deterministic PDF dispatches with zero data loss.
- Implemented schema validation and mathematical calculation engines, reducing manual document drafting cycles by 95%.

Cross-Platform Real-Time Analytics & Alert Engine

🌐 www.drakemarho.com

React React Native Node.js WebSockets MongoDB Tailwind CSS

- Engineered a unified multi-platform monitoring application delivering instantaneous operational alerts and secure state synchronization across web and mobile.
